Tailwind

Responsive Design

Chakra UI

## PROJECTS

### Docurious

- Docurious is an interactive challenge-driven application built with **React JS**, designed to help users take on skill-based challenges, track their progress, and earn achievements. The platform provides a seamless user experience through a responsive UI and real-time data integration.

### VeriPort (09/2024 - 01/2025)

- A lab testing management platform facilitating third-party employee health screenings for companies. Collect employee samples, perform health tests, and deliver results back to the respective companies. The platform ensures data accuracy, user privacy, and compliance with health standards.

### Zero Cheating (11/2023 - 03/2024)

- Zero Cheating is a platform focused on maintaining academic integrity, offering secure exam proctoring and paper verification software to prevent cheating and ensure fairness. With features for accurate monitoring and privacy protection, it enables institutions to conduct assessments transparently and uphold high standards of credibility.
